SUMMARY

Junior Software Engineer with hands-on experience in cross-platform mobile development (Flutter, Firebase) and frontend web technologies (React, Angular). Strong design sense and technical expertise, delivering user-centered solutions that balance functionality and usability.

EDUCATION

Capital University

Helwan, Cairo

Faculty of Computers and Artificial Intelligence, Software Engineering program - GPA 3.9

2022 – 2026

EXPERIENCE & INTERNSHIPS

Freelance Software Developer

Jan. 2025 – Present

Self-Employed

Egypt

- Collaborated with experienced industry veterans at local startups to translate business requirements into functional, high-performance web applications.
- Developed a bilingual (AR/EN) logistics platform for **Al Raedon** using **React, TypeScript, and Ant Design**.
- Deployed and managed **Orchid World Gate** corporate site, including hosting and domain configuration.

Cross-Platform Mobile App Development Internship

Jun. 2025 - Dec. 2025

Digital Egypt Pioneers Initiative - DEPI

Online

- Gained hands-on experience in cross-platform mobile app development using Flutter and Firebase.
- Enhanced problem-solving and debugging skills through practical project work.
- Applied authentication and security practices while integrating Firebase services.
- Participated in a structured soft skills program, enhancing communication, teamwork, and freelancing skills for professional growth.

Service Desk

June 2024

FABMISR

5th Settlement, Cairo

- Completed a short-term internship at FABMISR within the IT Service Desk department.
- Observed IT workflows across multiple departments, gaining insights into problem resolution processes within enterprise environments.
- Assisted the support team in handling common service requests and troubleshooting basic technical issues.
- Learned ticketing and escalation procedures used in enterprise IT service management.
- Gained exposure to communication practices between IT staff and end-users in a professional banking environment.

PROJECTS

Capital University Technical Ticketing System | *React, TypeScript, Ant Design, Git*

Sep. 2025 – Jun. 2026

- Developed a robust frontend for a university-scale support platform, utilizing TypeScript and Ant Design to manage complex data entry for technical maintenance requests.
- Architected dynamic forms with comprehensive validation logic to ensure accurate issue reporting and structured data flow to the backend.
- Implemented an interactive dashboard featuring real-time status filtering and data tables, allowing staff to track the lifecycle of technical requests from submission to resolution.
- Optimized UI performance by leveraging React hooks and modular component design, ensuring a responsive experience for high-traffic administrative use.

Al Raedon | *React, TypeScript, Ant Design, i18next*

Apr. 2026 – May 2026

- Architected a professional landing page for a logistics firm, featuring a high-performance multilingual interface (Arabic/English).
- Utilized Ant Design to create a sophisticated, responsive UI designed for corporate client engagement.
- Optimized TypeScript components for scalability and maintainability, preparing the platform for future dashboard integration.

LabLink Healthcare Solution | Flutter, Firebase, Git

Sep. 2025 – Dec. 2025

- Developed an end-to-end medical laboratory application as a DEPI Graduation Project to connect patients with diagnostic services.
- Integrated Firebase for secure user authentication and real-time laboratory result tracking.
- Engineered a seamless booking flow allowing users to schedule tests and view digital reports directly within the mobile interface.

University Club Management System | ReactJS, Bootstrap, Figma, Git

Jun. 2025 – Jul. 2025

- Contributed to the Phase 1 launch, building the central interface for member registration and subscription management.
- Collaborated on the UI/UX architecture to prepare for future RFID-based facility access and online payment integrations.
- Handled core state management for client information, facilitating a smooth transition for the long-term maintenance team.

University Exam Monitoring System | ReactJS, Bootstrap, Figma

May 2025

- Digitized the exam supervision process, creating a web portal used by 500+ users to manage staff assignments.
- Developed administrative tools for reviewing, approving, and assigning supervisors to specific exam sessions in real-time.

Orchid World Gate | HTML5, CSS3, JavaScript, GoDaddy Hosting

Jan. 2025 – Feb. 2025

- Delivered a professional web presence for an export corporation, serving as the lead freelance developer from design to deployment.
- Configured hosting and domain management via GoDaddy, ensuring 99.9% uptime for the client’s international services showcase.
- Optimized asset delivery and responsive design to ensure fast load times and cross-browser compatibility.

COURSES

UI/UX Design

Sprints

Jun. 2025

Online

- Gained hands-on experience in user research, wireframing, and prototyping.
- Designed responsive and accessible interfaces using Figma.
- Applied design thinking to create user-centered digital experiences.

Cyber Security

BUE, Impact

Aug. 2024

Online

- Completed an introductory course in cyber security.
- Learned fundamental concepts such as threats, vulnerabilities, encryption, and safe practices.

Artificial Intelligence and Machine Learning

Zewail University, Impact

Nov. 2023

Online

- Completed an introductory course in Artificial Intelligence and Machine Learning.
- Learned core concepts such as supervised learning, neural networks, and model evaluation.

TECHNICAL SKILLS

Frameworks & Libraries: Flutter (Bloc/Provider), ReactJS (Redux), Angular, Ant Design, NumPy, pandas, Matplotlib

Languages: JavaScript, TypeScript, Dart, Python, Java, C/C++, HTML, CSS, SQL

Cloud & Backend: Firebase, Supabase, Azure, Docker, REST APIs, Apidog, Postman

Databases & Data Tools: MySQL, PostgreSQL, MongoDB, Apache NiFi, SSIS, Alteryx

Developer Tools: Git, GitHub, Figma, VS Code, IntelliJ, PyCharm

PERSONAL SKILLS

Collaboration: Teamwork, Communication, Adaptability

Problem Solving: Creativity, Attention to Detail

Professionalism: Time Management, Proactive, Willingness to Learn

Languages: Arabic (Native), English (Fluent)
